## RECOMMENDED APPLICATIONS

These kits above are recommended for anyone **building a new home or remodeling** a kitchen and wanting the look of a built-in refrigerator. We offer two finishes and recommend ordering free samples so you can choose the one which best matches your refrigerator. Below are more details regarding the proud mount vs. the flush mount

PROUD MOUNT
We recommend this option (either the louvered or the flat) if you are remodeling or building a new home and have a refrigerator with a flat door profile **AND** doors thicker than 1-1/2". The proud mount will bring the top trim piece out so it sits flush with the doors and gives the refrigerator a nice built in look.

FLUSH MOUNT
We recommend this option (either the louvered or the flat) if you are remodeling or building a new home and have a refrigerator with curved door profile **OR** doors thinner that 1-1/2" thick. The flush mount will protrude about 1/2' from the face of the cabinets and give the refrigerator a nice built-in look.

We recommend this kit to clients who are **building a new home or remodeling** a kitchen and looking for the most budget friendly trim kit.

The kit receives rave reviews and is a great option for those looking for a more budget-friendly option.

We recommend this kit **if you have existing cabinets** and refrigerator with gaps on the top and sides. We offer two finishes and we recommend ordering free samples so you can choose the one which best matches your refrigerator. Below are more details regarding the proud and flush mount options.

PROUD MOUNT
We recommend this option if you have a refrigerator with a flat door profile **AND** doors thicker than 1-1/2". The proud mount will bring the top trim piece out so it sits flush with the doors and gives the refrigerator a nice built in look.

FLUSH MOUNT
We recommend this option if you have a refrigerator with curved door profile **OR** doors thinner that 1-1/2" thick. The flush mount will protrude about 1/2" from the face of the cabinets and give the refrigerator a nice built-in look.

We recommend this kit **if you have existing cabinets** and refrigerator with a gap on the top only. We offer two finishes and we recommend ordering free samples so you can choose the one which best matches your refrigerator. Below are more details regarding the proud and flush mount options.

PROUD MOUNT
This top trim piece will mount on the face of the cabinets and protrude about 1/2". It overlaps the each side of the cabinet 1/4". It is the easiest top trim piece to mount.

FLUSH MOUNT (no side pieces)
This is our most popular top trim option. Once installed, it sits flush with the front face of the cabinets.

FLUSH MOUNT (with side pieces)
Once installed, this top trim piece sits flush with the front face of the cabinet. It comes with side pieces fastened to the horizontal louvers. We recommend this option for top trim pieces over 10" tall, as it seems to make the tall grille more appealing.
